Integrated motorcycle- and race engineer

- The engineering course is giving a racing team’s engineering background focused training opportunity for students who already have degree from an engineering field of studies
- The program is coordinated by the Department of Whole Vehicle Engineering
- The group of lecturers are experts from MAMI (Hungarian Motorcycle Secondary School) and the Széchenyi István University – like the experienced motorcycle racer and World Champion Gábor Talmácsi
- Lecture by our Department:
  - Aerodynamics of racing vehicles
